

Have you had a stem cell transplant for multiple sclerosis? Join our survey.

New Zealand Neurologists are undertaking a survey of people who have travelled overseas to have a bone marrow (stem cell) transplant for multiple sclerosis. The study involves answering a questionnaire and giving consent for doctors to access your medical records. The study will not involve any change to your medical care. Your information will be kept confidential.

If you have had a bone marrow transplant for multiple sclerosis and would like more information about the study please contact pardi559@student.otago.ac.nz.

This study will improve our understanding of the experience and outcomes of bone marrow transplant for multiple sclerosis.

If you are in this group we would be grateful for your participation.
